Home

The EriSFaVIA project "Early Intervention Services for Families with Children with Vision Impairment and Additional Disabilities", is operating under the ERASMUS+ Programme, Key Action 2- Cooperation for Innovation and the Exchange of Good Practices (No: 2019-1-EL01-KA201-062886). The central notion of the EriSFaVIA project lies in the presence of a crucial situation which addresses a need that has been internationally acknowledged as very important and refers to children with vision impairment and additional disabilities (VIAD) or deafblindness (D/B) with their families.

Below the table, there is a breadcrumb trail: Home / Forum / Main Forum / General support / Annexes of Erisfavia. A blue banner states: 'This channel is accessible to all users to easily share company information.' Below this is the title 'Annexes of Erisfavia' with an 'Action' dropdown and a 'Moderation' button. Navigation buttons (Start, Prev, 1, Next, End) and a search icon are present. The user 'ahathazi' is shown as the topic author, with a profile picture and status 'Offline'. The main content area shows the post text: 'ahathazi created the topic: Annexes of Erisfavia', 'Dear All, the second document of the intellectual output referring to scoping and intellectual output refers to examples of documents that the institutions from the project consortium use.', 'We decide that this intellectual output would consist of three documents: Literature reviews, scoping and presentation of early intervention services from each country, the second documents refers to examples of documents ( assessment and intervention) and the third document would be the results of the questionnaires.', 'Please send me your feed-back, any suggestions or modifications that need to be done.', 'After your feedback the documnts will be edited in a nicer form. These are drafts.'

## Reply

You can send your message by using the **quick reply** box at the bottom of the thread, just write your message and hit «**Submit**».

The screenshot shows a forum post by user emine.ayyildiz. The post content is as follows:

emine.ayyildiz replied the topic: Annexes of Erisfavia

I found this file very well prepared, so I congratulate the Romanian team.

I just want to point out couple of minor things that I realized in the text.

At page 2, in the text of Example of Assessment Protocol, there is a part like Child illnesses&anomalies. I think instead of anomalies, we can use any other issues or something like that.

At page 10, INDIVIDUALISED should be INDIVIDUALIZED.

At page 24, at Family Information form, at item a) describe should be describe and at item c) fo should be for.

At page 26, I think instead of Individual Education Plan, it should be Individualized. At the same page there is misspelling like evaluation, it should be evaluation.

Thanks again you guys. I read it with pleasure.

Emine

You can also send your message by using the **Action/Reply** option and you can also attach a file using the “Attachments” box, a new box appears and you can drop files here.

To read and reply to a message on the topic click on the topic name and from the **Action** button select **Reply**.

The screenshot shows a forum post by user vassargi. The post content is as follows:

vassargi created the topic: Dear All

Dear All,  
Dear Friends and Partners,  
Hope everyone is OK considering the global mess due to the coronavirus. We are also very worried about the earthquake which took place in Croatia. Darija, how are things over there? Are you OK?  
These days are definitely very hard and we all need to focus on something positive in order to get through this extremely negative situation. Now regarding our issues, unfortunately no extra money will be provided by the National Agency or from the EC (to be honest I was expecting such an answer...). They told me that we don't have to worry about the eligibility of the expenses of the transnational meeting which in the end didn't take place. Article 11 covers all the force majeure situations - and coronavirus is included under this Article. This means that the costs of the flights are eligible despite the fact that we didn't travel to Cluj.  
So, we can "do" our meeting during the 1st training event which will take place in Munich in July. Now perhaps you will tell me that if things are getting better then yes we are going to meet in Munich, otherwise...Yes you are right but for the time being we have to wait and see...I suggest to wait till the end of May and then take altogether a decision about the training event. Till then, I suggest, it would be good to organize a skype meeting to see our progress and our next moves.

Dear Partners,  
these are the news so far. Please try to keep up with positive things and stay safe, stay well, stay optimistic!  
wish you all the best  
vassillis

PS  
try to answer and communicate through this platform so we can establish a forum uploading and sharing products and material

## Accessibility Widget - ADA/WCAG 2.1 compliance

Web Content Accessibility Guidelines (WCAG) defines how to make Web content more accessible to people with disabilities. Accessibility involves a wide range of disabilities, including visual, auditory, physical, speech, cognitive, language, learning, and neurological disabilities.

In erifavia portal we use **UserWay's Accessibility Technology** which is the world's most advanced and popular AI-powered accessibility compliance solution that ensures our website provides a digital experience that meets and exceeds WCAG 2.1 requirements, as required by the ADA and other governmental and regulatory bodies.

In the upper left corner of the website, there is an icon – widget that when pressed with the mouse or alternatively with CTRL-U from the keyboard, displays the Accessibility Menu. The only difference visitors who don't need the additional features will notice is the distinctive icon at the top of the page. Those who want to use it will find it available and easy to use on every page of the site.

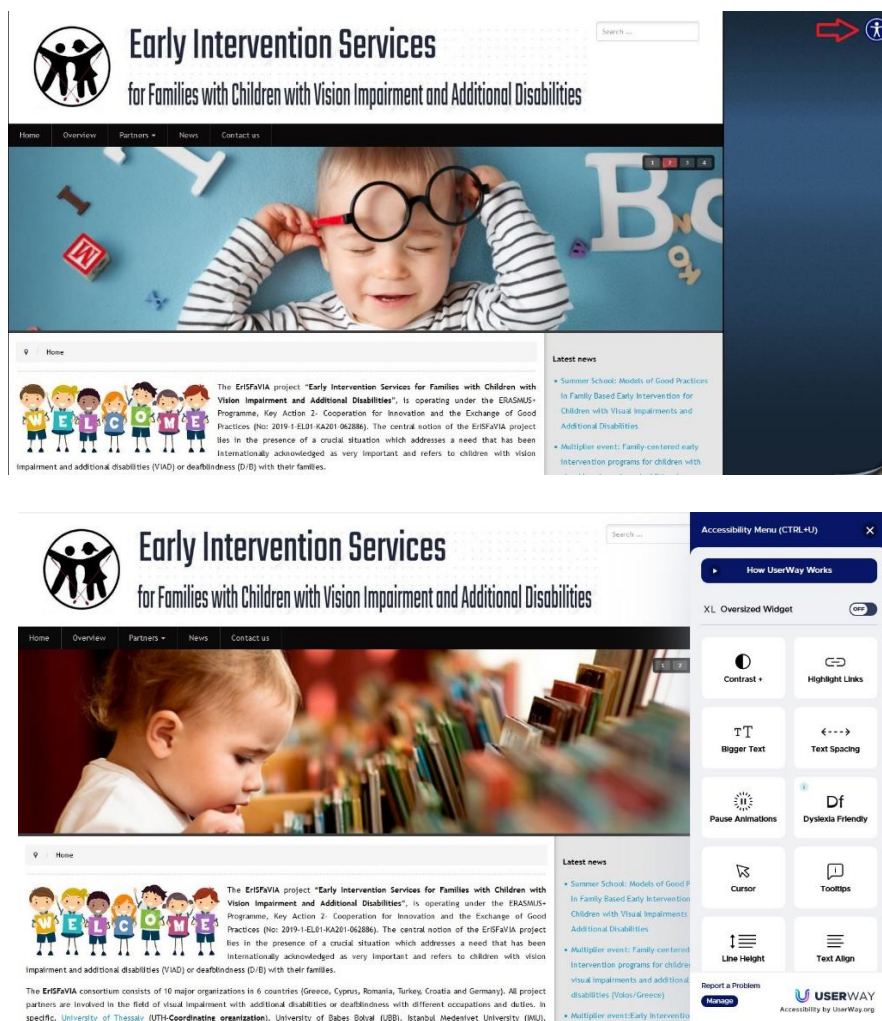

Figure 11 Accessibility icon/widget - Accessibility Menu

## UserWay Widget's Main Accessibility Functions

### **Contrast +**

Invert the colors of a website or switch between light and dark contrast modes.

### **Highlight Links**

Emphasize links, buttons, and other interactive elements in clear, high-contrast colors that are easy to identify. Highlights clickable items for easier site usability, navigation, and overall accessibility.

### **Bigger Text**

Cycles on-screen text through four different levels of size increases. Makes every part of your site instantly more readable.

### **Text Spacing**

Modify text and line spacing for improved readability for dyslexic and visually impaired users. Offers three degrees of adjustments for a personalized and more accessible reading experience.

### **Pause Animations**

Pauses content that moves or auto-updates that is considered an accessibility barrier. Stops animations, blinking, and flashing content that distracts and may trigger seizures.

### **Dyslexia Friendly**

UserWay's Dyslexia Friendly Font enhances readability for those with dyslexia and provides an easier and more fluid reading experience that is tailored to site visitors with dyslexia.

### **Cursor**

Increases the standard cursor size by 400% to ensure the pointer always remains in sight. Allows for faster and more accessible navigation through hyperlinks, tabs, and form elements.

### **Tooltips**

Shows alternative text and ARIA labels for on-screen elements with a simple mouse hover. Tooltips are prominent, high contrast, and easy to read for low-vision users with accessibility needs.

### **Line Height**

Increase line height to ensure more comfortable spacing for all on-site text.

### **Text Align**

Align site text left, right or center to ensure a personalized and more accessible reading experience.
